1. Poke/press/flip the paper to precrease the valley fold X’s.

2. Working from a corner on the back side of the paper, begin collapsing the X’s together.

3. When a critical mass of X’s have been trained to collapse, try placing the form flat on the table and push the sides inward simultaneously to collapse the foldouts.

4. On the back, pinch all of the protruding triangles to make it official!
